

Software engineer building products from ambiguity to operation.

For 25+ years, I've worked inside product and engineering teams—building systems, modernizing platforms, leading people, and turning unclear problems into software that works.

 Buenos Aires · Working globally in English and Spanish

Professional experience

	ClassDojo	2022–Present
	Fullstack Software Engineer	
	TypeScript platform modernization, product integrations, LLM features, AWS and Kubernetes.	
	SCVSoft	2021
	Tech Lead	
	Unified third-party APIs and reverse-engineered poorly documented IoT devices.	
	Medallia	2018–2021
	Senior Engineering Manager	
	Led a frontend team across three cities and modernized seven legacy Angular applications.	
	FutureAdvisor / SCVSoft	2016–2018
	Lead Software Engineer	
	Led a six-person team and evolved a Rails system toward AWS services.	
	Lemonade / VSKO	2013–2016
	Software Engineer	
	Built educational software for a Belgian client.	
	DLA TV	2012–2013
	Head of Development	
	Built QA from zero, expanded the development team, and defined delivery processes.	
	TeraCode / OpenEnglish	2009–2012
	Software Engineer → Project Manager	
	Grew the engagement to roughly 30 people.	
	Bumeran	2007–2009
	Software Engineer	
	PHP backend and a Java/Solr search engine over candidate resumes.	
	Globant	2006–2007
	Functional Analyst	
	Claxson / Mixplay	2003–2006
	Senior Developer	

Building software professionally since 2000.

Capabilities

01 Product engineering Zero-to-one · Product integration · Developer experience	02 Full-stack systems TypeScript · React · Node · PHP · Java · C# · Rails	03 Architecture & modernization Monoliths to services · REST · GraphQL · Realtime · Event-driven	04 AI-native development LLM features · Langfuse · Models · Orchestrators · Skills
05 Leadership Team building · Hiring · Mentoring · Delivery processes	06 Cloud infrastructure AWS · Kubernetes · Cloudflare Workers · D1 · PostgreSQL	07 Integrations Third-party APIs · Reverse engineering · Poorly documented devices	08 Domain modeling Ambiguous domains · Evidence-first probes · Privacy boundaries

Independent projects

 CORO Global conversations across languages. Semantic routing · Realtime · Multilingual Live 	 TRAZA A traceable story of financial activity. Reconciliation · Privacy · Cloudflare Live 
 BALLAST Inspectable portfolio scenarios. Monte Carlo · Optimization · Tax lots Live 	 JACARA Physical-first family games. Computer vision · Realtime · Voice Live 

Education & teaching

Systems Engineer · UTN Graduated March 2009 · Highest GPA in class	Strategic and Technological Management · ITBA-EOI Graduate coursework completed; thesis not submitted	UTN faculty · 2003–2021 Associate Professor, Systems Analysis · Teaching Assistant, Operative Systems (early years)

Mentoring

[Silver.dev mentor · Full Stack Live Coding & System Design](#) 

Let’s talk about an interesting problem.

Roles, collaborations, and product conversations are welcome when the company, industry, or problem is compelling.
