

Rodrigo Uroz

Software Engineer & Product Builder

hello@rodrigouroz.com · github.com/rodrigouroz · Buenos Aires · Working globally in English and Spanish

SUMMARY

For 25+ years, I've worked inside product and engineering teams—building systems, modernizing platforms, leading people, and turning unclear problems into software that works.

PROFESSIONAL EXPERIENCE

ClassDojo — Fullstack Software Engineer

2022–Present

Contributed to TypeScript platform modernization, Tutor integration, district communications and insights, and AI-assisted product and developer workflows.

SCVSoft — Tech Lead

2021

Unified third-party APIs and reverse-engineered poorly documented IoT devices.

Medallia — Senior Engineering Manager

2018–2021

Led a frontend team across three cities and modernized seven legacy Angular applications.

FutureAdvisor / SCVSoft — Lead Software Engineer

2016–2018

Led a six-person team and evolved a Rails system toward AWS services.

Lemonade / VSKO — Software Engineer

2013–2016

Built educational software for a Belgian client.

DLA TV — Head of Development

2012–2013

Built QA from zero, expanded the development team, and defined delivery processes.

TeraCode / OpenEnglish — Software Engineer → Project Manager

2009–2012

Grew the engagement to roughly 30 people.

Bumeran — Software Engineer

2007–2009

PHP backend and a Java/Solr search engine over candidate resumes.

Globant — Functional Analyst

2006–2007

Led functional analysis for a marketplace refactor.

Claxson / Mixplay — Senior Developer

2003–2006

Built a streaming platform with PHP, Oracle, C#, DRM and content encryption.

Building software professionally since 2000.

CAPABILITIES

- **Product engineering:** Zero-to-one · Product integration · Developer experience
- **Full-stack systems:** TypeScript · React · Node · PHP · Java · C# · Rails
- **Architecture & modernization:** Monoliths to services · REST · GraphQL · Realtime · Event-driven
- **AI-native development:** LLM features · Langfuse · Models · Orchestrators · Skills
- **Leadership:** Team building · Hiring · Mentoring · Delivery processes
- **Cloud infrastructure:** AWS · Kubernetes · Cloudflare Workers · D1 · PostgreSQL
- **Integrations:** Third-party APIs · Reverse engineering · Poorly documented devices
- **Domain modeling:** Ambiguous domains · Evidence-first probes · Privacy boundaries

INDEPENDENT PROJECTS

Coro

<https://coro.world>

Global conversations across languages. Semantic routing · Realtime · Multilingual

Traza

<https://traza.rodrigouroz.com>

A traceable story of financial activity. Reconciliation · Privacy · Cloudflare

Daturno

<https://daturno.com>

WhatsApp-first scheduling for businesses. Scheduling rules · Bounded AI · Operations

Ballast

<https://ballast.rodrigouroz.com>

Inspectable portfolio scenarios. Monte Carlo · Optimization · Tax lots

Jacara

<https://jacara.rodrigouroz.com>

Physical-first family games. Computer vision · Realtime · Voice

EDUCATION & TEACHING

Systems Engineer · UTN

Graduated March 2009 · Highest GPA in class

Strategic and Technological Management · ITBA-EOI

Graduate coursework completed; thesis not submitted

UTN faculty · 2003–2021

Associate Professor, Systems Analysis · Teaching Assistant, Operating Systems (Sistemas Operativos; early years)
